HUGHENDEN DISTRICT ALBERTA

A Booklet Issued By
**HUGHENDEN EXTENSION
OF SETTLEMENT CLUB**
HUGHENDEN ALBERTA

The Hughenden Extension of Settlement Club

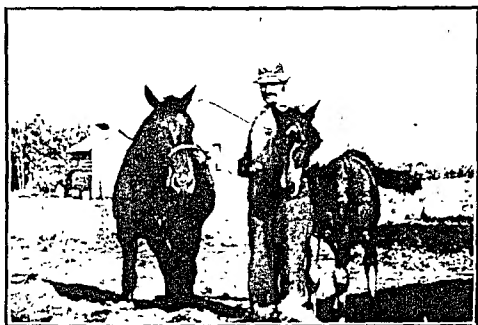

Hughenden, Alberta

LIVING, as we do, in a district not closely settled and in which there is still a large quantity of choice land within reasonable distance of our town and the railroad open to purchase, aware of the business and social advantages which will be ours with additional settlement, and knowing from experience the opportunity for independence which the development of this land offers to people of limited capital, this club, including in its membership the majority of our settlers, has been formed purely with the idea of placing before our friends some of the advantages of the Hughenden district. This we hope to do by means of this booklet and personal correspondence, giving reliable information pertaining to the rich agricultural lands for which the district is becoming famous.

We are thoroughly satisfied, from investigation and experience gained in our own actual farming operations, with some of us extending over a period of ten years, that our district affords the settler opportunities of as rich rewards as any that can be found in the great West.

The majority of the unimproved lands adjoining our farms are owned by the Canadian Pacific Railway Company. It is true that this and other companies own large areas of land in different portions of Alberta which are open to settlement. Our friends, however, have the opportunity to benefit largely from the great amount of time and money spent and the

Making a start in the Hughenden district

trouble taken by individual members of this club in investigating such lands before finally selecting this locality. New settlers may save that time and expense by coming direct to this district, when we are convinced they will think it unnecessary to go to the expense of investigating other parts of the country.

In the letters by our club members each individual has endeavored, so far as pos-

sible in the space at his disposal, to give such a plain, exact, detailed statement of the results he has been able to obtain in his farming operations that the reader, from these varied experiences, may gather an intelligent idea of what he should expect to accomplish.

The views shown are photographs taken in the vicinity of and on our own farms.

LOCATION

We are located in that portion of the province known as Central Alberta. Our town of Hughenden is located on the Edmonton-Winnipeg line of the Canadian Pacific Railway Company, one hundred and fifty-seven miles southeast of Edmonton, the second largest city in the province and one of the best markets for cattle, hogs and dairy products. In order that our location may be determined at a glance it has been plainly marked on the map herein.

CLIMATIC CONDITIONS

We have here what we believe to be ideal climatic conditions for the permanent health and happiness of the individual. The majority of the days are long and bright. The sun is warm, but as there is very little humidity in the atmosphere, it is always pleasant in the shade, and the nights are comfortably cool. Our experience has been, during all the years

we have lived in the district, that the winters are very agreeable, vastly ~~more so than a great many people,~~ who have never visited Alberta, seem to believe. We have snow, varying from a few inches to a foot in depth, for from two to three months each year, but blizzards are absolutely unknown. It is true that it sometimes gets cold, but these periods as a rule are of very short duration and are likely to be followed by weeks of comfortable pleasant weather. The following figures, taken from the government weather reports, will show this in a convincing manner.

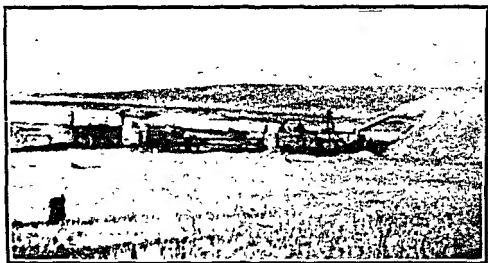

During the one hundred and fifty-one days in the months of November and December, 1913, and January, February, and March, 1914, there were eighty-one days in which the mid-day temperature at Edmonton varied from thirty to sixty-nine degrees above zero, sixty-one days in which it ran from zero to twenty-nine degrees above, and only nine days in which it ran below zero, the lowest point registered being nineteen degrees below.

The average annual precipitation at Edmonton for the past ten years has been 17.63 inches.

SOIL AND CONTOUR OF LANDS

The lands are what are locally known as "Park Country." That is there are clumps of willow and poplar brush here

and there, varying in extent and followed by open spaces of prairie ready for the plow, giving the district a park-like appearance. It is not difficult to clear this brush, but very important that a reasonable area should be left on each farm owing to its value as fuel, fence posts, building material and an admirable protection for stock during the winter months. The soil is a rich dark loam

Threshing Scene—Note the sloping prairie

underlain with a good clay sub-soil, and covered with a very heavy growth of native grass.

CROPS

The large yields of wheat, oats, barley and flax secured in Alberta are too well known to need emphasis here. However, our experience has been that more money can be made in this district by carrying on mixed farming, that is in dairying, raising cattle, hogs and feed than by

growing grain for the market. We, therefore, in addition to wheat, seed large areas to barley and oats, which produce very abundantly, as do also potatoes, cabbage, all root crops, garden truck of all kinds and small fruits.

Experiments have been conducted to such an extent with alfalfa, timothy and clover that we feel justified in stating

Hogs are money makers in Hughenden district

that they can be successfully produced. However, as the district is, as yet, rather sparsely settled, and owing to the heavy growth of native grass, heretofore mentioned, it has been unnecessary to go into tame grasses.

CATTLE AND HOGS

Having these rich pastures and abundance of grain we are fast becoming known as one of the great cattle raising

and finishing districts of the province. Dairying is rapidly becoming an important industry with us, the products of which always command good prices.

We claim a hog can be produced here as cheaply as any other place on the continent. When you understand that hog diseases are practically unknown in Alberta, and take into consideration our excellent markets, you will easily realize

Hugheaden district is famous for its horses

the splendid profits we are able to secure from this industry. We have direct railway connections with Edmonton, the great market to the North West, and also with all markets to the south and east.

FUEL

The question of fuel is always an important one, and in this we are particularly fortunate. Coal mines have

been developed in different portions of Central Alberta and a good quality can be purchased at prices ranging from \$1.50 per ton at the mine to \$4.50 per ton, retail, in town. In addition in some of the patches of brush are found trees of sufficient size to furnish excellent fuel.

SCHOOLS

The school system in Alberta is equal to any on the continent. The schools are organized and governed in very much the same manner as those in the United States. Owing to liberal government assistance the cost to the settler of maintaining the school is comparatively small. Each teacher employed must have a certificate of a recognized standard of education and a thorough system of government inspection is maintained.

Our school districts have been organized and school houses erected.

CHURCHES

Churches of almost all denominations are found in this district and services are being held regularly.

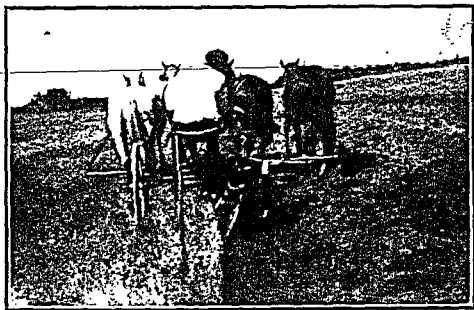

TAXATION

Farmers who have been accustomed to the system of taxation in agricultural parts of the United States will be interested to know that in Alberta no taxes are charged against the farmers' improvements, live stock, machinery or personal

effects. Taxation is simply on the land itself. Every dollar saved on taxes is a dollar added to the profit of the farmer, and a comparison of the rates here with those paid in older districts of high priced land, is very much in our favor.

TERMS

Add to the foregoing advantages the unusual and heretofore unheard of terms

Breaking prairie, Hughenden district

upon which the Canadian Pacific Railway is offering lands adjacent to us and you will come to a full understanding of why these lands are being rapidly taken up and our reasons for urging prompt action if you are to avail yourself of this opportunity.

One twentieth of the purchase price is payable in cash and the balance in nineteen equal annual installments with interest at six per cent per annum.

SETTLERS' LETTERS

Hughenden, Alberta,

January 14, 1915.

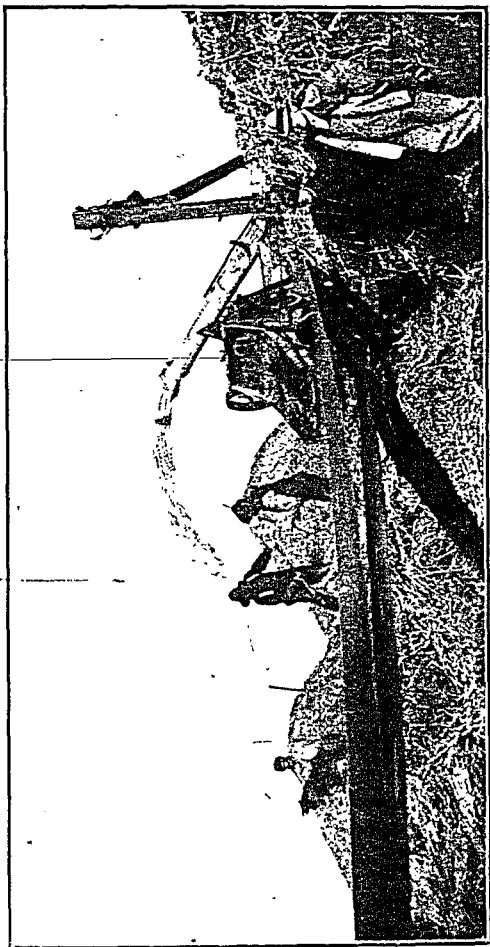

I have lived here since March 11, 1914. Can say I like the country fine. I settled on raw land, so only got breaking done last season. The land here has a fine rich soil well adapted to the raising of grains and vegetables. Crops and prices in this vicinity were good last fall. Wheat went from 35 to 40 bushels per acre, oats from 60 to 90 bushels per acre. Barley and flax are also grown here and yield well. There was a good crop of potatoes and other vegetables. The great abundance and good quality of natural grass for pasture and hay. make it a profitable country for stock raising. Horses, cattle and hogs are seen everywhere. Chickens and turkeys do well. The climate is good and healthful. So far the winter has been very mild. One can work outside every day and stock is looking fine. Not deep snow but plenty for good sleighing. One big advantage here is water which can be obtained at from 20 to 40 feet. There are also an abundance of springs and lakes. I see no reason why this is not an ideal country for diversified farming. Most ranchers in this district are from six to eight miles from market.

(Sgd.) J. F. HECKMAN.

Hughenden, Alberta,

January 15, 1915.

I came to this part of Canada in 1910, homesteaded and have lived on same to date. Have made a good living and about trebled my former capital. The soil is of good clay loam with clay sub-soil, some brush and stones, and rolling, plenty of water. It makes a very good mixed farming country. Have raised successfully roots of all kinds. Oats and barley have

Threshing Scene, Hughenden district

raised from 45 to 70 bushels per acre. Have seen Hughenden grow from one store to a prosperous burg of 200 inhabitants. We have good market and shipping facilities.

(Sgd.) ROBT. N. THOMAS.

Buffalo View, Alberta.

January 15, 1915.

I wish to say I was born and raised in Warrensville, Cuyahoga Co., Ohio, and moved to California and Washington where I lived about 10 years, and last spring moved to Alberta. We are located 14 miles northeast of Hughenden, joining the Buffalo Park. We have a rolling prairie with rich soil well adapted to mixed farming and stock raising. There are great opportunities here for a man of moderate means. I have a quarter section bought of the C. P. R. with house and barn or in other words a ready improved farm which they sell on the 20 year payment plan. They are well built and satisfactory according to plans. We like it here better than we did, and I have every reason to believe that the opportunities here are good and with good management and perseverance one need never be in want. The weather was warm and pleasant this summer and this winter has been fine, not too cold, with fine sleighing.

(Sgd.) J. W. THORP.

Hughenden, Alberta.

February 5, 1915.

I came to Alberta from Iowa 12 years ago with my four boys. I have done very well here and my boys, who did not have over \$400 between them when arriving here, are now worth between \$25,000 and \$30,000. The average wheat crop here is about 25 bushels to the acre and oats 45 bushels. The farmers who

do the best kind of farming often get a much larger yield than that. I don't think that there is any grass in the United States that will compare with that which grows here, the horses and cattle feeding on it all winter. Our grass fed beef is almost as good as the corn fed beef of the corn states. I have seen many horses worked right along here without any

Abundance of prairie chickens afford great sport

other feed than the prairie hay. I prefer this climate to that of Iowa. We have some cold weather but it is nearly always still and the cold is not very noticeable. I know of quite a number of people who have sold out here and gone back to the States, but in almost every instance it was not long before they

would return and be tickled to death to get back. A man can get land here from \$12 to \$17 per acre upon a payment of one-twentieth down, and with land such as we have here and upon such very easy terms, if he can't make it here he can't make it anywhere on earth.

(Sgd.) J. A. HOPFE.

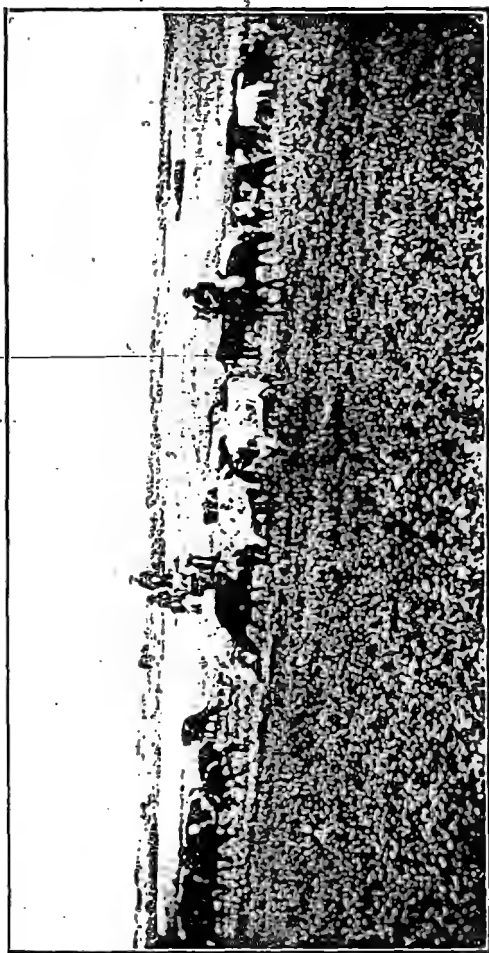

Hughenden, Alberta,
February 5, 1915.

I came to Alberta from Nebraska 12 years ago the 24th of August, and have been well satisfied with the country. I homesteaded in the Red Willow district near Stettler before Stettler was thought of. This is a good poor man's country. If a poor man can't make it in Alberta he can't make it anywhere. It is a good climate, a little cold sometimes in the winter, but it doesn't cut like the wind in the south. Cattle and horses run out all winter and don't need any shelter if you have a little feed for them. In the 12 years that I have been here I have never seen the time that there was not plenty of feed for stock. When a man has plenty of feed for stock he always has a living. It is a good farming as well as stock country, raising the largest grain crops I have ever seen.

(Sgd.) G. W. CLINE.

Hughenden, Alberta,
February 5, 1915.

I came from Washington and went to British Columbia and after traveling nearly all over that country, I came to Alberta. Of all the country I have traveled over, Alberta suits me better for a place to make a start than any I have seen. The first two winters I was in Alberta, 1913 and 1914, the stock of all kinds rustled all winter. There is no country where they raise larger grain crops than right

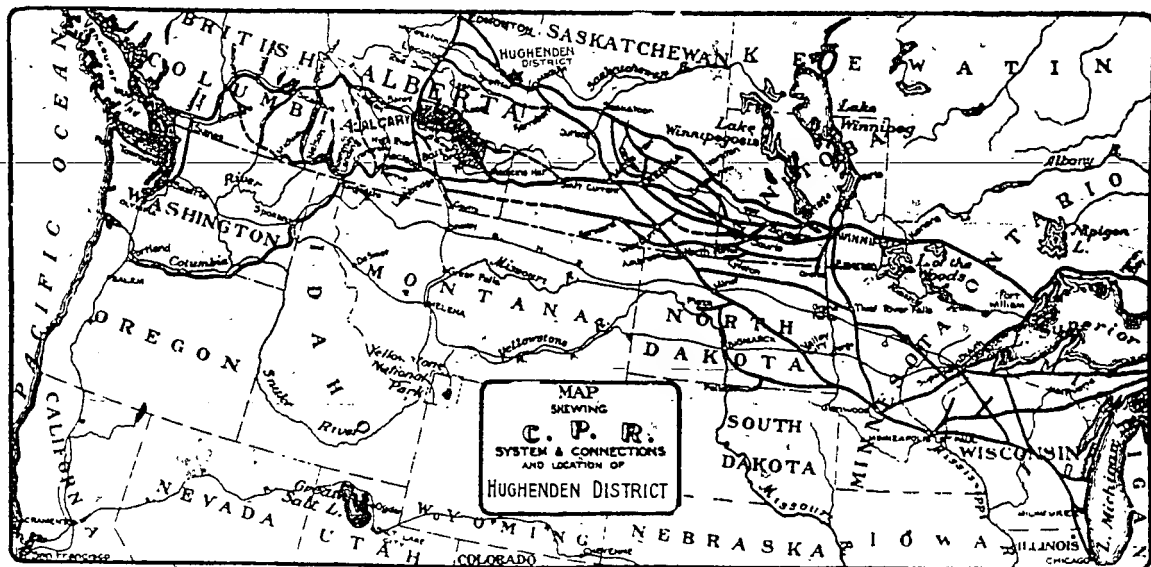

Dairy Cows, Central Alberta

here, wheat going from 20 to 40 bushels, and oats from 50 to 110 bushels. Potatoes do well here as a rule and garden vegetables grow very profusely. As fine a field of alfalfa as I have ever seen is growing on the place of one of my neighbors.

(Sgd.) J. B. BRADSHAW.

on account of the good crops raised and the fine prairie grass which makes good feed for horses and cattle summer and winter. Horses range outside all winter with no other feed than the prairie grass, which is something I have never seen before. From what I can find out I think this is one of the best grain

Hughenden, Alberta,

February 5, 1915.

I came to Hughenden from Aurora, Minnesota, about a year ago, and like the climate, here better than that of the "Gopher State." I consider this a good mixed farming country,

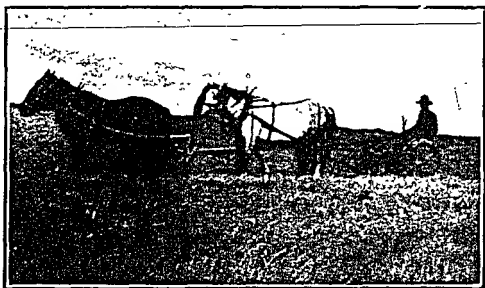

countries I have ever heard of, the crops being much larger than in Minnesota and the Dakotas. A man can come here with \$1,000.00, and if he handles it right can get a good start.

(Sgd.) J. W. WELLWOOD.

Hughenden, Alberta.

January 15, 1915.

In regards to the settlement of the Hughenden district, I, as an early settler, have seen all the rapid improvements in every line. In 1906 the C. P. R. steel only came as far as a town named Daysland, 80 miles west of here, and a bunch of us sturdy lads from old Ontario who were not quite satisfied with what we had there, landed at this point (Daysland) and some with oxen and some on foot set out to seek for a place to start life anew, and kept coming east until we found a district that

Note the natural grass in Hughenden district

suited our taste, and we finally located within a radius of five miles from this point. At that time there was nothing to break the monotony but the howling of the coyotes and the songs of the prairie chicken and the quacking of the wild ducks of which there were thousands, but we stuck to our claims and gradually with the aid of the faithful old oxen we managed to get considerable land ready for crop the following spring, and today our settlement is one of the best mixed farming districts between Saskatoon and Edmonton. The stock can rustle

outside all winter and in the summer there is abundance of wild grass and plenty of fresh water for the range stock. Now in place of the unbroken prairie that met one's eye nine years ago, there are prosperous farms with good buildings and countless herds of choice cattle and horses rambling around, making their owners rich. Cattle that could be purchased for \$25 in the early days bring \$75 and even as high as \$100 per head. The majority of those who stuck to their claims and were at all industrious are wealthy today and have purchased C. P. R. land under the easy payment plan, and find it no trouble to handle the contract. It really is wonderful to one who has been present all these years of rapid advancement to see the great changes that have taken place, the old ox cart has given way in many cases to the modern motor car, and the old fashioned clothes that, as the saying was, "It's good enough for the homesteader," have also had to take a back seat; and now one doesn't have to go to the city to see the latest styles, etc. They are always here. In conclusion, I will say that I, for one, will never regret the day that I decided to make the Hughenden district my home and feel sure that there are still the same chances for any one that is fortunate enough to get located here.

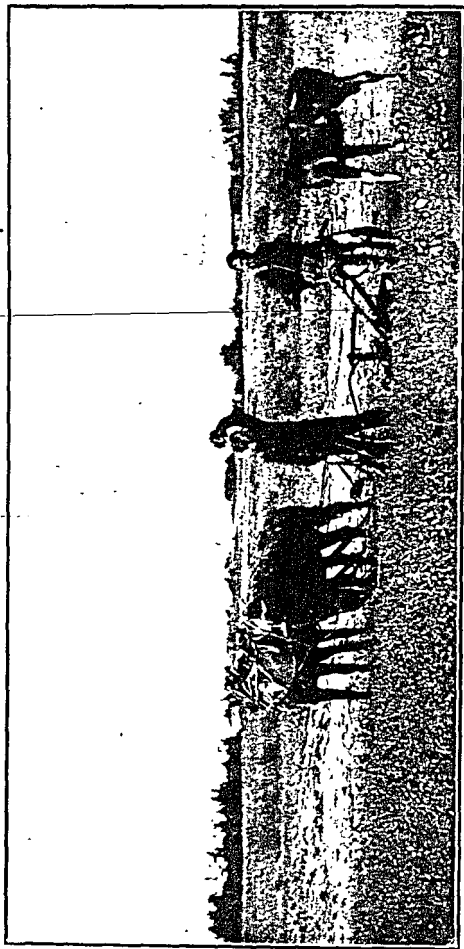

(Sgd.) H. A. OROK.

Hughenden. Alberta.

January 14, 1915.

I came from England about eighteen months ago, settled in this district, and do not regret seeing the advertisement which brought me here, as I find this a healthy country, also the possibilities in mixed farming and grain growing are great. There is still plenty of C. P. R. land to be had and any man with energy can make good.

(Sgd.) HENRY OTTO.

Note contour of lands in the Hughenden district

Hughenden, Alberta,

February 5, 1915.

I came to Hughenden from Minnesota five years ago. As a mixed farming and grain country I consider this district a world beater. Wheat this year went as high as 49 bushels to the acre, and oats 115 bushels. My father raised 345 bushels of potatoes to the acre, and all kinds of root crops and vegetables do exceptionally well, in fact, we can raise anything here excepting corn. The prairie grass

Vegetable Crop, Hughenden district

which grows here is exceptionally fine quality and very heavy, making very fine quality of hay. I like the climate here better than in Minnesota. It does not seem so raw in the cold weather. My taxes in Minnesota were \$45.00 on 120 acres, besides \$6.00 road taxes; here my taxes in all are \$21.00 on 160 acres. We have good schools and rural telephones which are owned by the government. I have always considered since I came here, and the fact becomes more apparent the longer I live here, that this is the only country I know of for a poor man. (Sgd.) E. A. RYDBERG.

Hughenden, Alberta,

February 5, 1915.

I came to Hughenden from Ontario in 1910. I don't know of any country that I like better for grain-growing and mixed farming. The average yield of oats in this district is about 60 bushels, wheat about 30 bushels. I don't think there is any better country for live stock. Horses rustle outside all winter without any other feed than the prairie grass and are in good shape in the spring. The soil is a black loam with clay loam sub-soil and very productive. Garden vegetables of nearly all kinds do well with the exception of tomatoes which are hard to ripen. The taxes on my 480 acres amount to \$48.00 per year. I came here with nothing and am doing well. I consider this a good country for a poor man to get started in.

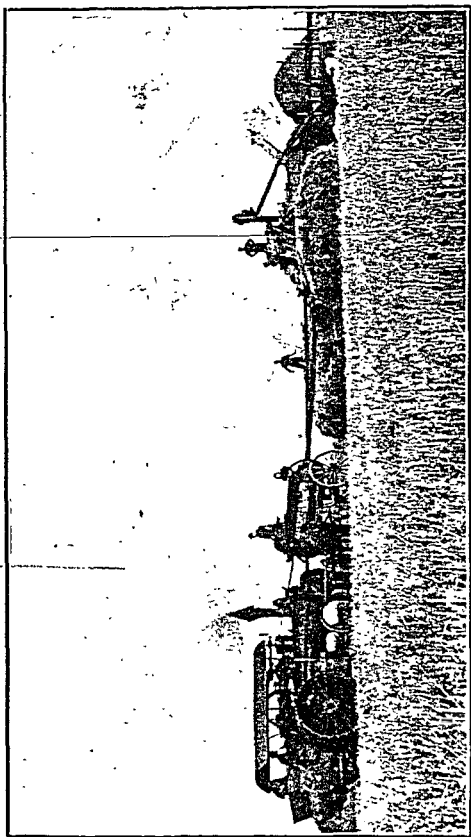

(Sgd.) W. BEACH.—

Hughenden, Alberta,

February 5, 1915.

I came here from Simcoe county, Ontario, in the spring of 1908 without any money, took up a homestead, and then took my carpenter tools and went to work for the summer and made good money. I hired 16 acres of breaking. The following spring I put this in wheat. I reaped 40 bushels of No. 1 northern to the acre. This put me on my feet and ever since then I have done well. I would not take three thousand dollars for my homestead at present. I would highly recommend any one who can work to settle down in Alberta where horses and cattle can almost run out the year round, and we can grow almost all kinds of grain and roots here to perfection.

(Sgd.) R. F. COTTON.

Threshing scene, Central Alberta

Hughenden, Alberta,
February 5, 1915.

I came to Minnesota from Norway, staying in Minnesota six months; came from there to this district. I have acquired a quarter section at home. I have acquired a quarter section of land and am in the way of accumulating the things that anyone needs to grow up with a good country. There are opportunities for many more if they want a good farm in a good mixed farming district.

(Sgd.) P. HOVDE.

Hughenden, Alberta,
February 6, 1915. .

I was born and raised in Canada. Born in Manitoba. I came here last fall. The country is all right, the best country I ever struck in Canada.

(Sgd.) A. J. CLIFFORD.

Hughenden, Alberta,
February 3, 1915.

I came to this country from Ottawa about eight years ago. I have been farming about six years. I have never yet raised under 25 bushels of wheat to the acre. One year was a little dry but that year we had a crop. I live on and own S. W. 30-39-8-4.

(Sgd.) S. LONSDALE.

Hughenden, Alberta, -
February 4, 1915.

I came up here from California, April, 1914. Bought 160 acres C. P. R. land. I believe there is no better land anywhere. The winters are much better than I expected. In fact, my wife and I have enjoyed the winters so far. I feel well satisfied and believe that I am-going to make good.

(Sgd.) C. J. ROSENBERGER.

Hughenden, Alberta,
February 4, 1915.

Early in April, 1914, we came up here from beautiful California, the land of the flowers and sunshine, but up here we find sunshine and flowers, and it's just as pleasant and delightful to us in many ways as California. We took up C. P. R. land which has proved to be fine land. We certainly are enjoying the climate which has been fine so far, and we feel well repaid for coming to Canada.

(Sgd.) MRS. C. J. ROSENBERGER.

Hughenden, Alberta,
January 15, 1915.

We landed here from Iowa March 14, 1914. I didn't have in much of a crop last year. I spent some time breaking sod on my new farm and raised a crop on adjoining lands that I had rented. This coming year I will have my own land in crop. I raised three colts this summer and I don't believe there are any better colts raised anywhere than they were and it is done with the natural prairie grass as their whole support. This is our first winter and it is not so cold as it was in Iowa. There are nine children in the family and we haven't had a doctor in the family since we have been here. In Iowa we had a doctor in the house every month and often every day. And there is no malaria fever here and nothing else that I know of.

(Sgd.) A. A. FRY.

Hughenden, Alberta,
January 15, 1915.

We came here in March, 1914 from Iowa, Tama County. The country here is like any other country. The climate here, while it is further north than our Iowa, is not much different. In winter it is cold and dry, but it

is not changeable with the rain and wind as with the more southern countries. The usual expression is that you do not feel the cold here as you do in a damper climate. I find it to be quite true and the summers, needless to say, are ideal. We don't have the sultry days that you experience in the south. As to wild prairie lands there are still some to be had. Anyone that would like to come to a new country and grow up with the country will find this country offering a good opportunity. Our experience is that the climate here is healthy. Last year I grew $36\frac{1}{2}$ bushels to the acre of wheat. This country bids fair to become as great a pork producer as Iowa which is considered the best on the continent. I live on the north half of 33-44-6, west of the fourth, which land I own, buying it in the raw state.

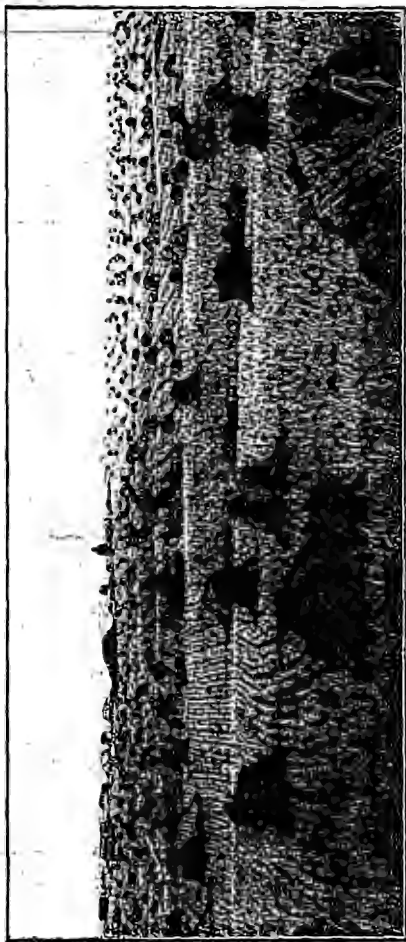

(Sgd.) GILBERT ELLWOOD.

— Hughenden, Alberta,

January 15, 1915.

We came here from Michigan and like the country fine and would like to see it well settled up. It is a good mixed farming country where a man can make some headway farming. There are a great many new farmers coming in and locating here every season, and the appearance of the country is changing fast. Our products are mainly wheat, oats, barley, and even speltz is raised. Garden crops do as well here as in Michigan, except tomatoes and cucumbers. Some things do far better here. If a man can't do well farming here the chances are that he couldn't make good elsewhere. We have raised as high as 100 bushels of oats to the acre. Last year our wheat went 35 bushels to the acre.

(Sgd.) LOYD LINDQUIST.

Wheat field in bloom, Central Alberta

Hughenden, Alberta,

January 15, 1915.

As I am a settler of this district I will write a few lines in regard to this country. I like the country fine and I don't think that there is any better place than this for mixed farming. Stock of all kinds does well. Wheat, oats and barley and wild hay grow fine.

(Sgd.) J. D. McHENRY.

Battle Ridge P. O., Alberta,

January 15, 1915.

~~I came here from Quebec about two years~~
ago and started to farm on a quarter section, and like it fine. I farmed in the east and I will say that I would not go back there to live for anything.

(Sgd) J. A. CAMERON.

Hughenden, Alberta,

January 14, 1915.

I came here with nothing 9 years ago from Scotland. I have been farming all the time. When I come here I was 80 miles back from the railroad; now I am $4\frac{1}{2}$ miles from town and the main line of the railroad. After looking over a vast area of land I located here, which is now the Hughenden district, and have never regretted my choice. This is an A No. 1 good mixed farming district. The opportunity for a new man is better than it used to be. You don't have to pioneer as I had to do. The prairie is covered with natural hay grass. There are vast numbers of prairie chickens, ducks and geese in the way of game. The climate is agreeable; the cold is that northern cold, a sort of muffled cold that doesn't freeze a person. The winter season is our season of pleasure as I have found.

(Sgd.) PETER McNEILL.

Hughenden, Alberta,

January 14, 1915.

Since my arrival in this country on the 21st of March, 1914, I have been very favorably impressed with the country in general. I bought 320 acres of land from the C. P. R. and to my mind it is just as good land as lies out doors. I brought 8 head of horses with me and they are running out and haven't been fed a spear of hay nor a bit of grain since I turned them out and they are all in splendid shape. The grass is fine.

(Sgd.) T. L. CHAMBERS.

Hughenden, Alberta,

January 15, 1915.

I located here in 1909 and have resided on the land since. Conditions of today are very different from the early days. We have schools, railroads and a fairly well settled district. The land I find to be ideal for mixed farming purposes, having lots of hay pasture and plenty of water; also the soil is a rich and heavy black loam with clay subsoil. Public lands cost from \$11.00 to \$13.00 per acre, but are not likely to remain on the market long.

(Sgd.) ALLAN YOUNG.

Hughenden, Alberta,

January 15, 1915.

Having wandered two-thirds around the globe looking for a suitable home to settle down in, the Hughenden district looked good to me in the summer of 1907, in fact, the most desirable I have run across in Western Canada. I located here eight years ago and am one of the pioneers of the Hughenden district, coming overland per ox team from Vermilion, 75

miles north on the C. N. R., when the now busy C. P. R. line was in the survey stage.

I have had fair success with grain and good success with stock raising. I find alfalfa does particularly well here. In my estimation there is no better mixed farming country on this continent than that in the immediate vicinity of Hughenden, and there is, strange to state, lots of land to be had cheap in this favored district.

(Sgd.) J. A. MACGREGOR.
